Chapter 1

Welcome

Hello! This book has onboarding resources for the Ocean Health Index (OHI). It is meant as a learning roadmap for groups that are interested in leading OHI assessments.

1.1 What is this book?

This book aims to help you get "on board" with Ocean Health Index (OHI) methods and practices. There are a lot of moving pieces to OHI assessments, and it's important to set yours up in a way that is organized and collaborative, expecting that team members might change and that methods might be revisited. So building in resilience and focusing on documentation and sharing from the beginning is critical.

This book is a roadmap for you to access the things you need.

Orient to the book, the websites, "github repos" Ohi-science.org incl ohi-global, OHI+ websites. Oceanhealthindex.org? Website books

Chapter 2

Overview of the OHI Process

Orient to the process: Learn > Conduct > etc PeerJ Fig 1, team roles, seaside chats, have meeting notes, write down decisions, etc. "structured approach". OHI+ examples Onboarding transparency, stakeholder engagement, teams open data science

Chapter 3

Learn about OHI

Orient to OHI: “goals”, “scores”, pressure/resil,

Chapter 4

Learn about OHI

Orient to OHI: “goals”, “scores”, pressure/resil,

Chapter 5

Learn about OHI

Orient to OHI: “goals”, “scores”, pressure/resil,

Chapter 6

Learn about OHI

Orient to OHI: “goals”, “scores”, pressure/resil,
